

Hackathon

Enable your customer to collaborate with Microsoft experts in a rapid, iterative fashion to apply creative technology solutions to business challenges.

A hackathon is a hands-on, intensely interactive and inclusive sprint to test the application of specific technologies against a set of business use cases. We work closely with key members of technical teams to transfer knowledge of the platform and services available for solution development. A private, secure development suite is set up with the tools necessary for team collaboration.

**Time investment:**

1-7 days

**Target audience:**

Architects, Designers, Software developers, IT professionals

**Deliverables:**

- Prototype solution
- White papers and reference material on technical underpinnings of solution

**Target outcome:**

Increased working knowledge of and hands-on experience with the Microsoft offerings that can be used to build the solution
