

Hands-on lab

Immerse your customer in a technology exploration session that will help them build the skills they need to develop the right solutions for their business.

An MTC hands-on lab is an immersive educational experience that enables your customer to develop and build solutions to drive their business. They will have the opportunity to get familiar with specific technologies and have access to experts along the way who can provide step-by-step guidance.

**Time investment:**

1½-3 days

**Target audience:**

IT professionals

**Deliverables:**

Varies dependent on topic

**Target outcome:**

First-hand, working knowledge of solution/technology
